AHS 3101
The NEW Health Professions Team

Taught by the Health Careers Center - University of Minnesota

What do Ebola, Multidrug-Resistant Tuberculosis, and Heart Disease have in common?

Tackling these problems requires an INTERPROFESSIONAL TEAM approach - across the health continuum, from prevention to treatment.

.............

AHS 3101: The New Health Professions Team will help prepare you for interprofessional problem-solving around complex health challenges.

Teams of students will explore the causes of several deadly diseases and strategize together to create prevention and treatment plans that could be implemented by interprofessional healthcare teams.

Learn how to think like a scientist, and act like a health professional.

Spring 2015
