Is that bone your dog found in the back yard a human bone or an animal one? This class will teach you the difference!

Impress your friends with your ability to identify human remains!

IN THIS CLASS YOU WILL:

- Learn about the biology and natural history of the human skeleton
- Build a foundation for study in medicine, forensic sciences, physical anthropology, and archaeology
- Learn the names of every bone in the body
- Get hands-on lab experience with actual artifacts, and learn excavation and preservation techniques
- Learn how to make quality skeleton jokes, like the one pictured on the right
