Itasca Director’s Graduate Research Fellowship in Limnology, Aquatic Ecology, or Water Quality – 2013 University of Minnesota

This Fellowship was established to fund graduate student research in and around Itasca State Park. In 2013, awards are available at a maximum each of $5000.

Eligibility Criteria for Graduate Students

1. Research must be done in or near Itasca State Park. Students must be in residence at the Itasca Biological Station & Laboratories for at least a portion of their research.
2. Applications must be full-time graduate students at any campus of the University of Minnesota for research in Limnology, Aquatic Ecology, or Water Quality or closely related areas.
3. Applicants must submit a minimum one-page research proposal with a budget attached. Grants may include funding for research expenses and living expenses. Applications are considered as they are submitted.
4. Research proposals must be signed by the applicant's advisor.

Contact Professor David D. Biesboer, Director, Itasca Biological Station and Laboratories at biesboer@umn.edu or at 612-625-1799 to determine your eligibility and discuss your research.
