

CBS Adventures Abroad

## Carolyn Kalinowski // Queensland, Australia

### How did you find out about this program?

I found my program by looking for the best universities in the world for marine biology, and James Cook University is the very top when it comes to undergraduate education outside of the U.S. Then I looked to see if the U had a program to go there and of course we did!

### What did you learn or gain from your time abroad?

In addition to becoming a certified Dive Master, I learned so much about coral reefs, reef fish, marine conservation and Australians! From the practical skills and knowledge to the ability to understand and fake an Australian accent, I felt like I was learning something new every day. The best aspect of my time abroad, however, was definitely all of the friends I made from the US, Europe, Oceania, and Australia.

### Student Scoop

**Major:** Ecology, Evolution and Behavior

**Program:** Spring semester in Queensland, Australia

**Advice for CBS students looking to study abroad:** Many CBS students worry about classes and graduating on time, but I found that the classes I took abroad fit perfectly with my studies and really augmented courses I have taken at the U.
