

CBS Adventures Abroad

## Danielle Sorensen // Borneo, Malaysia

### What did you learn or gain from your time abroad?

I learned firsthand about tropical climate change and conservation in one of the most biodiverse regions of the world. I was able to learn by immersing myself in a rich culture while working with other university students on three collaborative projects. Through designing a personalized project and carrying out data collection we were also able to publish a paper abroad.

### What about the program appealed to you the most?

The length and location of the global seminar is what appealed most to me. I was unsure if I wanted to do a full semester abroad but I also knew I wanted my experience to be more than a week long. Also, I didn't think when I was older that I would never go on vacation to a place like Borneo so being able to experience a place like this on the other side of the planet really appealed to me. This was truly a once in a lifetime experience.

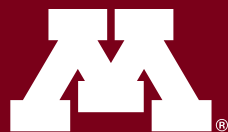

### Student Scoop

**Major:** Biology

**Program:** May session in Borneo, Malaysia

### Describe your experience in 5 words:

Rewarding, memorable, incredible, engaging, life-changing

College of  
**Biological Sciences**
