I worked as a subject tutor at the Lindahl Academic Center for a few years while I was a graduate student in the Earth Sciences department. You set your own availability, so there is flexibility to make it easier to juggle other commitments. Plus, the staff do all they can to help you get any materials you need and are very receptive to suggestions that may make tutor sessions more productive or efficient. It's a great way to make some extra spending money and simultaneously gain useful experience in your field of study!

— Sara K.

The most amazing part of being a Learning Assistant is watching students gain confidence in their own academic abilities and discover subject areas they are passionate about. It's just wonderful to be part of the process.

— Elizabeth J.
