

CBS Adventures Abroad

Lydia Cameron // Argentina

What did you learn or gain from your time abroad?

I learned so many different and unexpected things from my time abroad in addition to what was taught in my classes. Some of the key things I learned were about living in a different culture, adapting to another culture/city/language (and how difficult that can be) and how other countries view the United States. I think that each of these areas gave me new perspectives on life in the U.S. and views on the world in ways that I would never have been able to understand without this experience.

What advice do you have for CBS students looking to study abroad?

I think that the best thing that you can do when you are starting this process is to really jump in and commit. Have ideas in mind for what experience you want and find a program that fits the major things that you are trying to accomplish! There are so many programs out there that it can be hard to pick, so be sure you talk with people and use your resources to help find the best fit for you.
