

CBS Adventures Abroad

Madeline Jensen // Greece

What did you learn or gain from your time abroad?

My program was focused on aging and healthcare, so I was able to gain a ton of great experience for my future career as a PA with people and patients in the setting of another country in an economic crisis. I was able to see firsthand how healthcare can be heavily affected by politics. I met so many amazing people, and even learned how difficult yet important it is to be able to communicate with a language barrier.

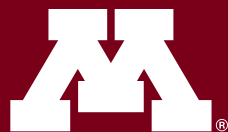

What advice do you have for CBS students looking to study abroad?

I would tell CBS students looking to study abroad to go for it! There are so many different program options to choose from. You can take elective courses, science courses, and even service-learning courses that will transfer and can be put towards your degree. You are guaranteed an experience you will never forget! 10/10 would recommend.
