

CBS Pre-Health Alumnus

Richard Shneur

“Being involved in extracurriculars helped me gain different experiences and learn skills that cannot necessarily get picked up in the classroom setting.”

– Richard Shneur

CBS alumnus Richard Shneur's advice for current CBS pre-health undergraduates: get involved in extracurricular activities to learn important real-world skills.

“Being involved in extracurriculars helped me gain different experiences and learn skills that cannot necessarily get picked up in the classroom setting,” Richard says.

Richard also recommends balancing the need for specific course content knowledge with a healthy dose of attention to the big picture of why we study important scientific topics in the first place.

As a CBS student, Richard supplemented his undergraduate studies with a leadership role in the Pre-Pharmacy Club, worked on the Pharmaceutical Repackaging Team for the Medical Reserve Corps, volunteered in a faculty lab. Richard is currently in pharmacy school at the U of M with career possibilities including a fellowship, a residency or MBA to supplement his eventual plan to get his pharmacy degree.

Alum abstract

Biology (2013)

Current position:

Pharmacy student, University of Minnesota

Undergrad fact:

Peer mentor with Nature of Life

College of
Biological Sciences

UNIVERSITY OF MINNESOTA
Driven to DiscoverSM
